

Mobile application security testing

AppSweep is a developer-friendly, mobile app security testing tool that quickly identifies vulnerabilities in your mobile apps, SDKs, and dependencies. Actionable recommendations help you fix identified issues early in development, keeping launches on time and on budget.

Built for mobile and aligned with OWASP standards, AppSweep is ready to scale your mobile app security testing needs to meet engineering challenges and security requirements.

AppSweep capabilities

Scan your app with AppSweep

- **Easy to use:** AppSweep allows organizations of all sizes to incorporate mobile app security testing within their development processes with unlimited apps and scans.
- **Designed for developers, built for mobile:** AppSweep allows developers to fix security issues rapidly with actionable recommendations. Scan Android and iOS apps with both SAST and IAST analysis and easily navigate through findings with an intuitive UI. Integrate mobile app security testing with major CI/CD tools via Command-Line Interface (CLI).
- **Based on security standards:** AppSweep streamlines mobile app security for developers by grouping findings according to OWASP standards (MASVS and MASTG) and showing which security controls (per OWASP MASTG profile) an app violates.

Scale effortlessly with AppSweep Enterprise

- **Scale with your team:** AppSweep Enterprise extends the mobile app security testing capabilities of AppSweep Standard to address developer challenges and security concerns within an organization, empowering developers to grant or restrict access based on individual roles.
- **Seamless integration:** The extended CLI lets teams integrate detailed findings with existing tools and processes for a smoother workflow.
- **Security policies:** AppSweep Enterprise equips security and IT managers with tools to enforce organizational policies like centralized login credentials through single sign-on (SSO), simplifying onboarding and offboarding. Plus, customizable data retention ensures adherence to data storage regulations and internal policies.

Get started with ease, scale effortlessly

AppSweep	AppSweep Enterprise
Pricing starting at €3,499/app	Pricing starting at €4,999/app
For individual developers or teams looking to add mobile application security testing to their development process. AppSweep features: • Unlimited scans of Android & iOS apps • Unlimited team members • Multi-techniques analysis (static application security testing & interactive application security testing) • CLI for continuous integration (CI) • Alignment with OWASP MASVS categories • Web/email based support	For organizations that need to manage and scale mobile application security testing across teams and policies. AppSweep Enterprise features: • All of the AppSweep features plus: • Single Sign On (SSO) and teams support • Extended CLI integration • Automated data retention policies • Support for larger apps (up to 1 GB) • Downloadable PDF report of findings • Focus only on relevant issues by excluding unreachable vulnerabilities

Guardsquare offers the most complete approach to mobile application security on the market, delivering the highest level of protection, with ease. Guardsquare's software integrates seamlessly across the development cycle, from app security testing to code hardening to real-time visibility into the threat landscape. Guardsquare products provide enhanced mobile application security from early in the development process through publication.

More than 900 customers worldwide across all major industries rely on Guardsquare to help them identify security risks and protect their mobile applications and SDKs against reverse engineering and tampering in the ever-evolving threat landscape.
